PROJECTS

Covid Help Disk using MERN stack

May 2021 – May 2021 (1 week)

-> In the covid 19 pandemic more people are dying just because they are unable to find a hospital where there are oxygen, beds and medicine available in the other end in some hospitals they are going waste just because of mis management / not using them efficiently.

-> With the help of Covid Help Disk people can find hospitals where oxygen, beds and medicine are available and can go to that hospital directly without wasting time in searching by visiting all nearby hospitals.
